

## AMENDMENTS TO THE CLAIMS

Please add claims 15 to 18 as follows:

- 4u5
15. (New) The method of claim 1, further comprising:  
determining a path to the target; and  
indicating the path to the target by a shape having a window, wherein the window marks the path.
16. (New) The method of claim 1, further comprising:  
determining a path to the target; and  
indicating the path to the target by a pattern of lines centered on the target,  
wherein at least two lines are spaced differently from at least one other line, wherein the  
at least two lines frame the path.
- A,
17. (New) The apparatus according to claim 8, further comprising:  
a graphic path marker generator for determining at least one graphics path marker  
that identifies a path to the target,  
wherein the graphics proximity marker is a shape comprising a window, wherein  
the window marks the path.
18. (New) The apparatus according to claim 8, further comprising:  
a graphic path marker generator for determining at least one graphics path marker  
that identifies a path to the target,

A<sub>1</sub>

wherein the graphics proximity marker is a pattern of lines centered on the target,  
wherein at least two lines are spaced differently from at least one other line, wherein the  
at least two lines frame the path.
